

Sparx Systems recognized by CIO Review as a Leading Provider of BPM Solutions

CRESWICK, Australia, April 29, 2015 – [Sparx Systems](#) has been recognized by a distinguished panel of CEO's, CIO's, CMO's, VC's, analysts and the CIO Review editorial board, from a select group of over 300 companies as one of the "most promising BPM technology solution providers".

Sparx Systems' inclusion in the CIO Review BPM Technology Special is based on its capability to provide technology solutions to streamline operations in a faster, less resource-intensive manner, while keeping costs under control.

At the front of stage in this recognition is the Sparx Systems flagship product, Enterprise Architect, an integrated modeling, design and construction platform that is redefining business process modeling. The Enterprise Architect platform allows business process diagrams and models to exist within the more global context of the architectural and systems environment, while supporting the modeling of enterprise architectures, software and hardware systems and other key aspects of the modern business environment.

"This acknowledgment is testimony to Sparx Systems vision of tightly integrating business processes into an overall enterprise architecture in a uniform and standards compliant manner. Business process models should not exist in isolation, but contribute to and draw from the broader strategic architectural systems and software models that make up a functioning enterprise" said Sparx CEO, Geoffrey Sparks.

In the coming years Sparx Systems envisages new tools and information processing capabilities that further support the transformation of models into executable form. Further information about Enterprise Architect can be obtained by visiting www.sparxsystems.com

About Sparx Systems

Sparx Systems is a global software company specializing in high performance visual modeling tools for planning, designing and constructing software-intensive corporate systems. Sparx tools are used by systems designers, corporate planners, business analysts, enterprise architects, standards developers and software engineers.

Sparx modeling software is widely used in finance, defense, government, aerospace, automotive engineering, geospatial, entertainment, health, smart grid, aviation, retail and telecommunications. Over 80 per cent of Fortune 100 companies have licensed Sparx Systems flagship modeling tool Enterprise Architect. In the past decade the Sparx user-base has grown from 30,000 to more than 350,000 individuals worldwide. Sparx tools are based on the Unified Modeling Language (UML), an open standard developed by the Object Management Group (OMG), where Sparx Systems is a Contributing member. Sparx Enterprise Architect provides robust support for team-wide collaboration, and can scale up from single-user deployment to teams with dozens or even hundreds of collaborators - including remote collaborators. Sparx software is price competitive even when deployed across the entire development team.

Sparx Systems has won five consecutive SD Times Top 100 awards and two Readers Choice Merit Awards from Visual Studio Magazine and Jolt. Now at version 12, Enterprise Architect is available directly from Sparx or - bundled with expert support and comprehensive training services - from a network of more than 300 technology partners active in North America, Europe, Australia, India, China, Japan, southeast Asia

and Latin America. First developed in 1998, Sparx Systems' Enterprise Architect modeling tool was commercially released in 2000, and has enjoyed more than 15 years continuous development and growth.
