MDG Technology for CMMN

Using Sparx Systems Enterprise Architect and the MDG Technology for Case Management Model and Notation (CMMN) you can create models representing a subject under a particular situation to achieve a desired outcome, as in legal or medical proceedings.
MDG Technology for CMMN

The MDG Technology for the Case Management Model & Notation (CMMN) allows you to create CMMN models with Enterprise Architect.

“A Case is a proceeding that involves actions taken regarding a subject in a particular situation to achieve a desired outcome. Traditional examples come from the legal and medical worlds, where a legal Case involves the application of the law to a subject in a certain fact situation, and a medical Case involves the care of a patient in the context of a medical history and current medical problems.”

(Quoted from the Object Management Group (OMG) Case Management Model and Notation Specification (Version 1.0, May 2014))

This image shows a CMMN diagram created with Enterprise Architect:

Access

Click on the 'Perspective' icon (top right corner of the display) and select Perspective > Analysis > CMMN; the Model Wizard displays.

Select either the:
- 'Model Patterns' tab and one of the Patterns to add a template CMMN model to the selected Package, or
- The 'Diagram' tab and select 'CMMN > CMMN' to add an empty CMMN diagram to the selected Package; the CMMN page displays in the Diagram Toolbox

CMMN Modeling
